LinkedIn | GitHub | Leetcode | Portfolio

Summary

Computer Science Engineering student with hands-on experience in **full-stack web development, MERN stack, Python, RESTful APIs, JWT authentication, role-based access control, MongoDB, MySQL, React.js, Node.js, and Express.js**. Experienced in building secure and scalable web applications, implementing **CRUD operations, API integration, authentication, authorization, responsive UI, analytics dashboards, and database-driven applications**. Strong foundation in **Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, and Computer Networks**, with **200+ DSA problems solved on LeetCode**.

Education

Future Institute of Engineering & Technology, Bareilly	2023 – 2027
Bachelor of Technology in Computer Science Engineering	CGPA: 8.0
Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks	
St. Joseph's Senior Secondary School, Puranpur	2022
Intermediate – PCM	79%
St. Joseph's Senior Secondary School, Puranpur	2020
High School	86%

Experience

Frontend Developer Intern – Twwios Technologies Pvt. Ltd.	Jul 2026 – Present
- Converted Figma UI/UX designs into responsive and reusable web pages using HTML, CSS, JavaScript, and React.js. - Implemented responsive layouts and cross-device designs to ensure consistent user experience across desktop, tablet, and mobile screens. - Collaborated with the development team to translate design requirements into functional, pixel-accurate frontend interfaces and refine UI based on feedback.	
Full Stack Development Intern – Codemax Digital Solutions	Jun 2026 – Jul 2026
- Completed hands-on full-stack development work involving frontend and backend web application development, strengthening programming and software engineering skills. - Worked on application development tasks involving UI development, backend logic, debugging, API integration, and problem solving in a practical development environment.	

Projects

Complaint & Issue Tracking System	MERN Stack, MongoDB, Express.js, React.js, Node.js, JWT GitHub Repo Live Demo
- Architected a full-stack MERN application for end-to-end complaint lifecycle management with separate user and admin workflows. - Implemented secure JWT authentication and Role-Based Access Control (RBAC) to protect complaint data and restrict administrative operations. - Developed RESTful APIs supporting complaint CRUD operations, threaded comments, status management, and notification workflows. - Built an interactive React and Recharts analytics dashboard to visualize resolution time, workload distribution, complaint categories, and trends.	
AI Chatbot for FAQ Automation	Python, NLP, Scikit-learn, React.js, REST APIs GitHub Repo Live Demo
- Developed an AI-powered FAQ chatbot using Python, NLP, intent classification, and semantic matching to automate frequently asked queries. - Exposed chatbot functionality through RESTful APIs and integrated a real-time React-based chat interface for interactive user communication. - Created an admin module to manage FAQs, review unanswered queries, and improve training data for continuous chatbot enhancement.	

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, HTML5, CSS3, Bootstrap, Flexbox, DOM Manipulation, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, API Integration, CRUD Operations
Databases: MongoDB, MySQL, Database Design, Data Modeling
Authentication: JWT Authentication, Role-Based Access Control (RBAC), Authorization, Secure API Access
Tools & Concepts: Git, GitHub, MERN Stack, Data Structures & Algorithms, OOP, Debugging, Software Development

Achievements & Certifications

Achievements: 2nd Rank in College – AKTU Semester Examination | Solved **200+ DSA Problems** on LeetCode across arrays, trees, graphs, and dynamic programming.
Certifications: Cisco Networking Academy – Introduction to Modern AI | IBM Skills Network – Artificial Intelligence Virtual Internship | NASSCOM – Digital Application Fundamentals (STEM)
